

Customer Information Sheet for Creating Templates

1) Millimeter to inch conversion reference:

Millimeter	Decimal	Fraction
3mm	.11"	1/8"
5mm	.19"	3/16"
6mm	.24"	1/4"
13mm	.5"	1/2"
20mm	.78"	3/4"

2) Recommended thickness for specific applications:

3mm – Single color steps, bow kits, under gunnels (3mm SeaDek are square knife cut only).

5mm – Single color swim platform pads, floor kits, step kits and other applications where SeaDek is used for traction not anti-fatigue mats or bolsters.

6mm –Two color projects, pads with logos and any of the above projects listed

13mm –Two color Helm station pads, poling platform, casting platforms, etc.

20mm –Two color coaming bolsters, seat cushions

3) Warranty Consideration :

Note, because of excessive heating when exposed to sunlight, black is not recommended as a top color. Therefore, it is not covered under the product warranty. For full product warranty details please see the link below.

<http://www.seadek.com/t-documents.aspx>

4) Overview:

Each sheet of clear vinyl represents 1-sheet of SeaDek. For larger parts or kits, please tape together sheets or pieces of clear vinyl and our CAD department will break down the parts appropriately. Please use the boat diagram to illustrate a rough idea of where each part belongs on the boat and how each piece relates to each other. Mark the top, bow, and stern on each part so that orientation is easily identifiable. **Please do not fold the clear vinyl sheet.**
